

Gripsert Safety Tread

Are you concerned about the safety of standard timber decking in wet conditions?

Looking for an alternative to anti-slip products, plastic netting or paint & grit?

- Anti-slip surface exceeds NZ safety standards (tests available)
- Aluminium tread is pressed into timber planks in machining process
- Planks are available in lengths up to 3m to build ramps and steps
- Ideal where a permanent ramp is required or to upgrade an existing ramp
- We deliver nationwide for installation by building contractors
- Gripsert is used extensively for public boardwalks and school upgrades
- Specified for ACC housing modifications
