

Timber Gripsert Ramp

- Meets Ministry of Health ramp specifications and safety requirements
- Modular design and a range of components to suit individual requirements
- Ramps are built in our workshop to speed install process and reduce site time
- Aluminium Gripsert insert exceeds the safety standards (test results available)
- No need for painting or coating with special surfaces or covering with netting
- Aluminium 'Leader' ensures timber is not in contact with the ground
- Aluminium frame and fittings reduce maintenance
- Handrail options: timber or aluminium
- Ramps are removable and re-usable
- A cost-effective option for long-term use
- Planks are also available for builders to construct ramps on site
- NZ-designed and manufactured for our weather conditions
- Back up service and custom components available
