

# Threshold Ramps

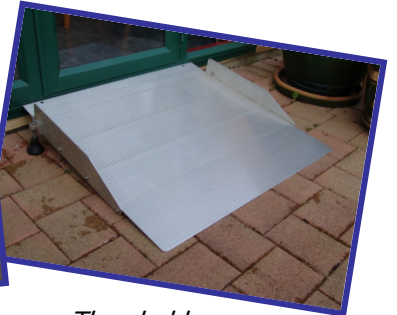

*Threshold ramp  
without side frames*

*Rubber threshold ramp*

*Adjustable legs*

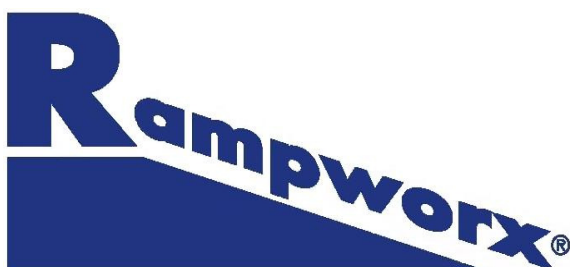

*Threshold ramp  
with side frames*

- Ramp gradients between 1:8 and 1:12 meet safety guidelines
- Available in a range of lengths from 200mm to 1200mm
- Tread surface of aluminium ramps exceeds NZ safety standards
- 75mm side frames are standard on aluminium ramps
- Standard width of 850mm with custom sizes available
- Aluminium ramps can be fastened down for extra security
- Easy to install - no mess, no fuss, no inconvenience
- Low maintenance

## Which is the best option for you?

**Aluminium threshold ramps** are lighter and height-adjustable, so are easier to move and can be re-used elsewhere. They come in standard lengths and can be fastened down for additional safety and security.

**Rubber threshold ramps** are usually cheaper, but are a fixed height and larger ramps can be heavy, so are not as easy to move. They are made from recycled rubber and can be customised to required widths and lengths.
